PARENTAGE STATUS: DNA analysis qualifies the above parentage

DATE TESTED: 02/12/2022

Comment: Alleles were identified by a panel of internationally recognised markers on each sample to give a parentage testing efficacy rate in excess of 99.99%, using sire, dam and offspring. Absence of one parent reduces the efficacy in parentage verification

The allele sizes reported are in accordance with the International ISAG Nomenclature.

Rebecca M. Weld, PhD.
